

## Saliva DNA Collection, Preservation & Isolation Devices

### Non-invasive, Reliable, Cost-effective

A user-friendly all-in-one procedure for the collection, preservation & isolation of saliva DNA at ambient temperatures

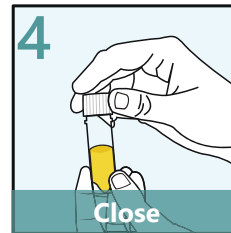

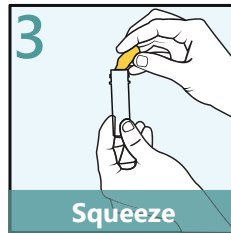

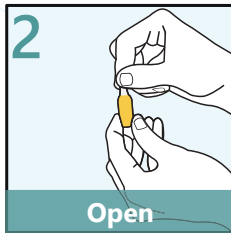

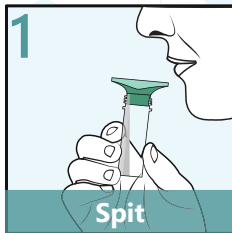

- ✓ Complete, affordable solutions for saliva DNA collection, preservation, & isolation
- ✓ Simply spit, squeeze, and ship
- ✓ High DNA yield and integrity
- ✓ Inhibitor-free DNA for qPCR, sequencing, etc
- ✓ Preserve saliva DNA for over 6 years
- ✓ Customization options available

# Customize Your Product

We offer customization for the outer packaging, instruction sheets and labels of our collection devices. The outer packaging can be designed and produced in your company's brand (logos, slogans, etc.)

## Donor Procedure
